#### Homework

- Read every day for at least 20 minutes - reading to an adult is important as it allows the reader to develop fluency and accuracy and to talk about what they are reading. We believe that you are never too old or too good at reading to benefit from this.
- Learn the weekly spellings set by your child's class teacher. Going over these words once or twice a day will help your child to remember them, not just for a test but in their future work.
- Learn the maths facts and/or times tables set by your child's class teacher. These are important as they underpin all of the maths that your child will do in the rest of their time in education; knowing these facts will make it easier for your child to do maths, particularly as the ideas become more complex higher up the school and into high school.
- In Year 6 there will be some additional practice and revision work in English and Maths in preparation for SATs in May 2019 and for transition to high school. If these activities are done regularly and thoroughly, it will make a big difference to your child's learning progress and confidence. There are also additional **optional** activities that your child can do if you wish, such as researching a topic being studied in class.
