2nd October 2018

Dear Parents

In Science this term, Year 5 are looking at the life cycles of flowering plants. Next week we will be looking at how seeds are formed in plants and how they are then dispersed. To help teach the children about this, we thought it would be good to give them the opportunity to find some examples of seed dispersal for themselves...and with Eaton Park on our doorstep, what better opportunity than that?

So, we are hoping to head over to Eaton Park for a seed hunt on Wednesday 3rd October (weather permitting). Children will be supervised by school staff at all times and will leave school after lunchtime, returning by the end of the school day. Please make sure that the children have a warm, waterproof coat in school on that day and comfortable shoes (school shoes or trainers should be fine).

If you have any queries regarding this visit then please contact the school office.

Yours faithfully
